**FOR IMMEDIATE RELEASE**

**New Selenium, JMeter, and ATDD/BDD Courses Offered by SQE Training**  
*New dates added for Python®, Agile Testing, and ISTQB® Certification courses*

JACKSONVILLE, FL — SQE Training, a TechWell company, has announced new courses in Selenium test automation, JMeter performance testing, and acceptance test-driven development (ATDD) and behavior-driven development (BDD) for 2018.

"As agile, DevOps, and continuous delivery reshape development, testing, and delivery processes used by modern software development teams, the lines between analysis, development, testing, and operations roles have become blurred. Today's software professionals require broader knowledge and deeper technical skills," said Michael Sowers, TechWell CIO and SQE Training President.

"This is the first of many new course offerings to respond to the needs of teams and organizations driving digital transformations and embracing open source tooling and modern methods to deliver software faster, better, and cheaper.

"These specific courses help individuals, teams and companies automate functional and performance testing and transform user requirements into testable specifications."

[Selenium Test Automation: From the Ground Up](#) is a one-day, hands-on course that teaches how to incorporate industry best practices to build maintainable user interface test suites. Course locations include Austin, TX, and Boston, MA.

[JMeter™ Performance Testing Workshop](#) is a two-day course outlining how JMeter is used to test performance, both on static and dynamic resources, and more. Course locations include Washington, DC, and Orlando, FL.

[ATDD/BDD with an Introduction to Cucumber for Java](#) helps participants understand how to transform requirements accurately into testable specifications, with an additional introduction to Cucumber with Java. Course locations include Chicago, IL, and Orlando, FL.

In addition to these new courses, additional dates and locations have been added for [Python® for Testers](#), [Software Tester Certification—Foundation Level](#), [Agile Tester Certification](#) and [Agile Test Automation—ICAgile](#) at SQE Training's Agile Testing Training Weeks. Details on each courses, including ways to save, can be found at [sqetraining.com](#).

###

**ABOUT SQE TRAINING:**

SQE Training, a TechWell company, ([sqetraining.com](http://sqetraining.com)) helps organizations worldwide improve their skills, practices, and knowledge in software development and testing. SQE Training offers certification for software testers through the ISTQB®—International Software Testing Qualifications Board, agile certifications through the ICAgile, ScrumMaster and Product Owner certifications through the Scrum Alliance®, and requirements engineering certifications through IREB, the International Requirements Engineering Board. SQE Training is also a Registered Education Provider (R.E.P.) with the Project Management Institute (PMI).

**ABOUT TECHWELL:**

TechWell—through its conferences, training, consulting, community websites, and online resources—helps people and organizations develop and deliver great software. For more information, visit [www.techwell.com](http://www.techwell.com)
